1.) Erzeugung einer Message Queue

msgid = msgget(IPC_PRIVATE, IPC_CREAT | 0777); int msgid **Programm UNIX-**Message-Queue-Tab. Kern 99 100 101

1.) Erzeugung einer Message Queue

msgid = msgget(IPC_PRIVATE, IPC_CREAT | 0777);

msgget() weist der neuen Queue in der Message-Queue-Tabelle eine beliebige, bisher freie Stelle zu ...

1.) Erzeugung einer Message Queue

```
msgid = msgget(IPC_PRIVATE, IPC_CREAT | 0777);
```

int msgid

100

... und schreibt den "Identifier" dieser Stelle in die Variable msgid.

msgsnd(msgid,&message_snd,sizeof(message_snd)-sizeof(long),0);

3.) Lesen einer Nachricht aus einer Message Queue

3.) Lesen einer Nachricht aus einer Message Queue

msgrcv(msgid,&message_rcv,sizeof(message_rcv)-sizeof(long),0,0);
